

AHMAD SYAHIDUL AMIN BIN MOHAMAD AZNAL

RESUME

PROFILE

Driven technical professional seeking an Automation Engineer or related role or similar firms. Skilled in PLC programming (Siemens/Wecon/Omron), IoT integration, and real-time security modules including face detection and alarm systems. Experienced in deploying monitoring systems using MQTT and Telegram API. Seeking to apply expertise in Distribution Energy Systems and Automated Safety Monitoring within a fast-paced engineering environment and ready to contribute to Industry 4.0 revolution, manufacturing and any intelligent automation engineering environments.

ACHIEVEMENT

- **OMRON COBOT Level 1 Training** — Completed specialized training on collaborative robotics, enhancing skills in automation and robotics integration.
- **Participation in FORUM TVET IN AI DRIVEN ECONOMY** — Engaged in discussions on AI's impact on technical education and industry.

WORK EXPERIENCE

ASJ COMPONENTS SDN (M) BHD

2023 - 2024

TECHNICIAN

- Diagnosing problems, replacing faulty components, and ensuring smooth operation.
- Assisting operators and other staff with technical issues.
- Keeping records of maintenance, repairs, and equipment performance.

JOHOR SKILLS (JCORP)

2023

EXPERTS CRAFTMANS MACHINING IN PROCESS

- Setting up CNC machines, lathes, milling machines, and other machining tools to perform precise cutting, drilling, and shaping operations.
- Crafting metal with extremely tight tolerances using advanced techniques such as milling, turning and grinding.
- Training in 2 months period as short course taken.

OHNISHI ELECTRONIC (M) SDN BHD

2022

INTERN

- Able to complete all tasks given within specified duration with high quality product.
- A good team player in performing and delivering works.
- Training in 6 months period as internship partner.

No 45, Jalan Impian 2/17,
Taman Impian Jaya,
81400, Senai, Johor

EDUCATION

2024 - CURRENT UNIVERSITY MALAYSIA PAHANG AL-SULTAN ABDULLAH

- Bachelor of Technology
Electronic Automation
Industrial with Honors
- GPA 3.7 / 3.8

2018 - 2022 TANJUNG PUTERI VOCATIONAL COLLEGE

- Diploma of Electronic
Technology
- GPA: 3.67 / 3.69

SKILLS

- Project Management
- Public Relations
- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking

LANGUAGES

- Malay (Fluent)
- English (Intermediate)
- Chinese (Basics)

SUMMARY

Driven technical professional seeking an Automation Engineer or related role or similar firms. Skilled in PLC programming (Siemens/Wecon/Omron), IoT integration, and real-time security modules including face detection and alarm systems. Experienced in deploying monitoring systems using MQTT and Telegram API. Seeking to apply expertise in Distribution Energy Systems and Automated Safety Monitoring within a fast-paced engineering environment and ready to contribute to Industry 4.0 revolution, manufacturing and any intelligent automation engineering environments.

WORK EXPERIENCE

ASJ COMPONENTS SDN (M) BHD 2023 - 2024

- Diagnosing problems, replacing faulty components, and ensuring smooth operation.
- Assisting operators and other staff with technical issues.
- Keeping records of maintenance, repairs, and equipment performance.

JOHOR SKILLS (JCORP) 2023

- Setting up CNC machines, lathes, milling machines, and other machining tools to perform precise cutting, drilling, and shaping operations.
- Crafting metal with extremely tight tolerances using advanced techniques such as milling, turning and grinding.
- Training in 2 months period as short course taken.

OHNISHI ELECTRONIC (M) SDN BHD 2022

- Able to complete all tasks given within specified duration with high quality product.
- A good team player in performing and delivering works.
- Training in 6 months period as internship partner.

EDUCATION

BACHELOR OF TECHNOLOGY IN INDUSTRIAL ELECTRONIC AUTOMATION WITH HONOURS 2024 - CURRENT

University Malaysia Pahang AL-Sultan Abdullah

- GPA 3.7 / 3.8

Diploma of Electronic Technology 2018 - 2022

Tanjung Puteri Vocational College

- GPA: 3.67 / 3.69

CERTIFICATES & ACHIEVEMENT

- **OMRON COBOT Level 1:** Certified in Collaborative Robotics and Automation.
- **Forum TVET in AI Driven Economy:** Participant and Contributor.
- **Data Analysis Excellence:** Certified in Advanced Microsoft Excel for Engineering.

TECHNICAL SKILLS/SERVICES

Computer aided design CAD	Siemens/Mitsubishi/Wecon	PLC Programming
Computer aided manufacturing	Android Studio	Phyton Programming
CAM system	Eplan Electric P8	SCADA/HMI
CX Designer/Programmer	Cisco Packet Tracer	HTML/JavaScript/C language

SPECIALIZED PROJECTS

IIoT-Based Substation Monitoring System (End-to-End Deployment)

- Designed and developed a complete Industrial IoT (IIoT) substation monitoring system from field level to cloud.
- Integrated Digital Power Meters (DPM) with PLC (Modbus RTU/TCP) for real-time data acquisition (Voltage, Current, Power, Energy).
- Implemented data processing, scaling, and energy (kWh) calculations within PLC logic.
- Developed web-based dashboard for real-time monitoring, visualization, and analytics.
- Deployed system using MQTT protocol for cloud communication and remote access.
- Enabled data-driven decision making through live energy tracking and system performance insights.
- Covered full pipeline: hardware → PLC → communication → cloud → web system deployment.

Industry 4.0 Teaching Factory (Production Line Revamp & Automation Integration)

- Led the revamp of a previously abandoned production line into a functional IR 4.0 teaching factory system.
- Performed complete rewiring and system redesign, improving reliability and maintainability.
- Integrated and validated actuators, sensors, and control components for full operational recovery.
- Implemented advanced wiring techniques, including:
 - Modular sensor & valve box design
 - Structured industrial wiring layout
 - Use of modular connectors for power pack systems
- Configured PLC-based control system with communication between:
 - Main Control Panel HMI
 - Sub Control Panel HMI
 - Using Send/Receive data communication method
- Integrated TM Flow Robot Arm system for automated process handling.
- Conducted movement testing, signal validation, and system commissioning.
- Enhanced system towards smart manufacturing concepts (Industry 4.0 readiness).

Web-Based Face Detection & Security Monitoring System

- Developed an AI-powered face detection system integrated with web interface for access control.
- Implemented real-time identity verification using Python and JavaScript.
- Integrated alert system (Telegram API) for unauthorized access detection.
- Designed for industrial safety and security monitoring applications.
